CAREER OBJECTIVE

An energetic and enthusiastic young individual with HTML, CSS, C, C++, Java skills seeking a challenging position to prove my ability for the development of myself and the company.

WORK EXPERIENCE

JAVA INTERN

Scrop Tech PVT.LMT duration

- Executed multiple Arduino projects during internship, demonstrating proficiency in circuit design, programming, and troubleshooting.
- Designed and implemented a smart home automation system, enhancing efficiency and convenience for residents.
- Collaborated on a team to develop a weather monitoring device, providing real-time meteorological data.

PROJECT

Smart Home Automation System with AI Integration

Created a system that makes your home smarter. You can control lights, thermostats, and more using just your voice. The system learns your habits to save energy and keeps your home secure with facial recognition. Use a mobile app to control everything, even when you're away.

Technologies Used:

- Java for making things work
- AI for learning and predicting
- Mobile app for easy control
